An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at [direxion.com](http://direxion.com). A Fund's prospectus and summary prospectus should be read carefully before investing.

There is no guarantee that the ETFs will achieve their investment objectives. Direxion's Leveraged and Inverse ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investments. Investing in the ETFs may be more volatile than investing in broadly diversified funds. The use of leverage by an ETF means the ETFs are riskier than alternatives which do not use leverage.

Direxion Shares Risks: An investment in the ETFs involves risk, including the possible loss of principal. The ETFs are non-diversified and include risks associated with concentration that results from an ETF's investments in a particular industry or sector which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. The ETFs do not attempt to, and should not be expected to, provide returns which are a multiple of the return of their respective index for periods other than a single day. For other risks including leverage, correlation, daily compounding, market volatility and risks specific to an industry or sector, please read the prospectus.

Direxion Relative Weight ETFs Risks - Investing involves risk including possible loss of principal. The ETFs' investments in derivatives may pose risks in addition to, and greater than, those associated with directly investing in or shorting securities or other investments. There is no guarantee that the returns on an ETF's long or short positions will produce high, or even positive returns and the ETF could lose money if either or both of the ETF's long and short positions produce negative returns. Please see the summary and full prospectuses for a more complete description of these and other risks of the ETFs.
