## Leveraged & Inverse ETFs

### Direxion Daily Cloud Computing Bull and Bear 2X Shares

#### Overview

The Direxion Daily Cloud Computing Bull and Bear 2X Shares seek daily investment results, before fees and expenses, of 200%, or 200% of the inverse (or opposite), of the performance of the Indxx USA Cloud Computing Index. **There is no guarantee the funds will meet their stated investment objective.**

These leveraged ETFs seek a return that is 200% or -200% the return of its benchmark index **for a single day. The funds should not be expected to provide two times or negative two times the return of the benchmark's cumulative return for periods greater than a day.**

#### Target Index

The Indxx USA Cloud Computing Index (IUCLOUDN) is provided by Indxx, LLC. and includes domestic companies that deliver cloud computing infrastructure, platforms, or services. The companies included in the Index are involved in the delivery of computing services – servers, storage, databases, networking, software, analytics, and more, over the internet, which is often referred to as the "Cloud." The Index Provider has defined cloud computing to include three themes: Infrastructure as a service; Platform as a service; and Software as a service. **One cannot invest directly in an Index.**

*Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.*

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.
