

Direxion Daily US Infrastructure Bull 2X Shares

Overview

The [Direxion Daily US Infrastructure Bull 2X Shares](#) seeks daily investment results, before fees and expenses, of 200% of the performance of the Indxx US Infrastructure Index. **There is no guarantee that the fund will achieve its stated investment objective.**

This leveraged ETF seeks a return that is 200% of the return of its benchmark index **for a single day. The fund should not be expected to provide two times the return of the benchmark's cumulative return for periods greater than a day.**

Target Index

The Indxx US Infrastructure Index (IUSINF1) is designed to track the performance of U.S. listed securities, including ADRs, of companies which are involved in infrastructure through engineering, design, maintenance, and construction of infrastructure projects. The Index Provider defines infrastructure as being comprised of Construction & Engineering Services and Industrial Transportation companies. Companies that derive a minimum of 50% of their total revenue from Construction & Engineering Services or Industrial Transportation are eligible for inclusion. The Index Provider screens companies based on various market capitalization and liquidity metrics and selects the top 100 securities by market capitalization. In case there are fewer than 100 securities in the selection list, all the securities will form the portfolio. The Index constituents are equally weighted and the Index is reconstituted and rebalanced annually. **One cannot directly invest in an index.**

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the fund's website at www.direxion.com.

Short-term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

Direxion Shares Risks – Investing involves risk including possible loss of principal. There is no guarantee the investment strategy will be successful. The Fund is non-diversified and include risks associated with the Fund concentrating its investments in a particular industry, sector, or geography which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. Risks of the Fund include Effects of Compounding and Market Volatility Risk, Leverage Risk, Derivatives Risk, Market Risk, Natural Disaster/Epidemic and Market Disruption Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Daily Index Correlation/Tracking Risk, Other Investment Companies (including ETFs) Risk, and risks specific to investing in infrastructure companies as well as the Industrials and Utilities sectors. General risks of infrastructure companies include the general state of the economy, intense competition, consolidation, domestic and international politics, and excess capacity. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
