* Unlike traditional ETFs, or even other leveraged or inverse ETFs, these leveraged or inverse single-stock ETFs track the price of a single stock rather than an index, eliminating the benefits of diversification and substantially increasing risk.

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at direxion.com. A Fund's prospectus and summary prospectus should be read carefully before investing.

There is no guarantee that the ETFs will achieve their investment objectives. Direxion's Leveraged and Inverse ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investments. Investing in the ETFs may be more volatile than investing in broadly diversified funds. The use of leverage by an ETF means the ETFs are riskier than alternatives which do not use leverage.

Direxion Shares ETF Risks – An investment in the ETFs involves risk, including the possible loss of principal. The ETFs are non-diversified and include risks associated with concentration that results from an ETF's investments in a particular industry, sector or company, which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. The ETFs do not attempt to, and should not be expected to, provide returns which are a multiple of the return of their respective index or underlying security for periods other than a single day. For other risks including leverage, correlation, daily compounding, market volatility and risks specific to an industry, sector or company, please read the prospectus.
