

YOU'RE INVITED TO A CELEBRATION!

On September 1st, 2022, Direxion will be ringing the Opening Bell at the NASDAQ exchange in New York's Times Square.

Please join us as we celebrate the launch of our new suite of Single Stock Leveraged & Inverse ETFs.

If you wish to attend, please **RSVP** to Cassie Burbine at burbinec@direxion.com by **Friday, August 26th at 5PM ET.**

Be sure to include your first name, last name, phone number, company name, and job title.

All attendees are required to arrive at the NASDAQ site no later than 8:30AM.

Further details will be emailed to all attendees the week of the event.
Thank you!

Hope to see you there!

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at direxion.com. A Fund's prospectus and summary prospectus should be read carefully before investing.

Leveraged and Inverse ETFs pursue daily leveraged investment objectives which means they are riskier than alternatives which do not use leverage. They seek daily goals and should not be expected to track the underlying index over periods longer than one day. They are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk and who actively manage their investments.

Investing in the funds involves a high degree of risk. Unlike traditional ETFs, or even other leveraged and/or inverse ETFs, these leveraged and/or inverse single-stock ETFs track the price of a single stock rather than an index, eliminating the benefits of diversification.

Single Stock Daily Leveraged & Inverse ETFs pursue daily leveraged investment objectives which means they are riskier than alternatives which do not use leverage. They seek daily goals and should not be expected to track the underlying individual security over periods longer than one day. They are not suitable for all investors and should be utilized only by investors who understand leverage risk and who actively manage their investments.

Direxion Shares Risks – An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with the Fund concentrating its investments in a particular security, industry, sector, or geographic region which can result in increased volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. Risks of the Fund include Effects of Compounding and Market Volatility Risk, Leverage Risk, Derivatives Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Daily Correlation/Tracking Risk, Tesla, Inc. Investing Risk, Apple, Inc. Investing Risk, Single Security Risk, Market Risk, Indirect Investment Risk, Trading Halt Risk, and risks specific to the consumer discretionary sector, electric and autonomous vehicles companies, and automotive companies' risk. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
