Direxion Daily Junior Gold Miners Index Bull and Bear 2X Shares

Overview

The [Direxion Daily Junior Gold Miners Index Bull and Bear 2X Shares](#) seek daily investment results, before fees and expenses, of 200%, or 200% of the inverse (or opposite), of the performance of the MVIS Global Junior Gold Miners Index. **There is no guarantee the funds will achieve their stated investment objectives.**

These leveraged ETFs seek a return that is 200% or -200% of the return of their benchmark index **for a single day. The funds should not be expected to provide two times or negative two times the return of the benchmark's cumulative return for periods greater than a day.**

Target Index

The MVIS Global Junior Gold Miners Index (MVGDXJTR) tracks the performance of foreign and domestic micro-, small- and mid-capitalization companies that generate, or demonstrate the potential to generate, at least 50% of their revenues from, or have at least 50% of their assets related to, gold mining and/or silver mining, hold real property or have mining projects that have the potential to produce at least 50% of the company's revenue from gold or silver mining when developed, or primarily invest in gold or silver. **One cannot invest directly in an index.**

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.
