

LMBO REKT

Leveraged & Inverse ETFs

Direxion Daily Crypto Industry Bull 2X and Bear 1X Shares

Overview

The [Daily Crypto Industry Bull 2X and Bear 1X Shares](#) seek daily investment results, before fees and expenses, of 200%, or 100% of the inverse (or opposite), of the performance of the Solactive Distributed Ledger & Decentralized Payment Tech Index. **There is no guarantee the funds will achieve their stated investment objectives.**

These leveraged ETFs seek a return that is 200% or -100% the return of its benchmark index **for a single day. The funds should not be expected to provide two times or negative one times the return of the benchmark's cumulative return for periods greater than a day.**

Target Index

The Solactive Distributed Ledger & Decentralized Payment Tech Index (SOLDLDPN) seeks to track the performance of US-listed securities that have business operations in the field of distributed ledger or decentralized payment technology, which the Index Provider defines as the following business fields: blockchain technology, non-fungible tokens, decentralized finance, and digital asset mining hardware. **One cannot invest directly in an index.**

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.

Fund Facts

	Direxion Daily Crypto Industry Bull 2X Shares	Direxion Daily Crypto Industry Bear 1X Shares
Fund Symbol	LMBO	REKT
Intraday Indicative Value	LMBO.IV	REKT.IV
Bloomberg Index Symbol	SOLDLDPT	SOLDLDPT
CUSIP	25461A593	25461A585
Daily Target	200%	-100%
Gross Expense Ratio	4.96%	3.80%
Net Expense Ratio*	1.00%	0.49%
Inception Date	7/17/2024	7/17/2024

**The Net Expense Ratio includes management fees, other operating expenses and Acquired Fund Fees and Expenses. If Acquired Fund Fees and Expenses were excluded, the Net Expense Ratio would be 0.95% for LMBO and 0.45% for REKT. The Funds' adviser, Rafferty Asset Management, LLC ("Rafferty"), has entered into an Operating Expense Limitation Agreement with each Fund. Under the Operating Expense Limitation Agreement, Rafferty has contractually agreed to waive all or a portion of its management fee and/or reimburse a Fund for Other Expenses through September 1, 2026, to the extent that a Fund's Total Annual Fund Operating Expenses exceed 0.95% for LMBO and 0.45% for REKT of the Fund's average daily net assets (excluding, as applicable, among other expenses, taxes, swap financing and related costs, acquired fund fees and expenses, dividends or interest on short positions, other interest expenses, brokerage commissions and extraordinary expenses). If these expenses were included, the expense ratio would be higher.*

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds' website at direxion.com. Short-term performance, in particular, is not a good indication of a fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

Important Information

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at direxion.com. A Fund's prospectus and summary prospectus should be read carefully before investing.

CUSIP Identifiers have been provided by CUSIP Global Services, managed on behalf of the American Bankers Association by Standard and Poor's Financial Services, LLC, and are not for use or dissemination in any manner that would serve as a substitute for a CUSIP service. Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

Solactive AG is not a sponsor of, or in any way affiliated with, the Direxion Daily Crypto Industry Bull 2X Shares or Direxion Daily Crypto Industry Bear 1X Shares.

Direxion Shares Risks – An investment in a Fund involves risk, including the possible loss of principal. A Fund is non-diversified and includes risks associated with the Fund's concentrating its investments in a particular industry, sector, or geography which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause prices to fluctuate over time.

Leverage Risk – The Bull Fund obtains investment exposure in excess of its net assets by utilizing leverage and may lose more money in market conditions that are adverse to its investment objective than a fund that does not utilize leverage. A total loss may occur in a single day. Leverage will also have the effect of magnifying any differences in the Fund's correlation with the Index and may increase the volatility of the Fund.

Daily Index Correlation Risk - A number of factors may affect the Bull Fund's ability to achieve a high degree of correlation with the Index and therefore achieve its daily leveraged investment objective. The Bull Fund's exposure to the Index is impacted by the Index's movement. Because of this, it is unlikely that the Bull Fund will be perfectly exposed to the Index at the end of each day. The possibility of the Bull Fund being materially over- or under-exposed to the Index increases on days when the Index is volatile near the close of the trading day.

Daily Inverse Index Correlation Risk - A number of factors may affect the Bear Fund's ability to achieve a high degree of inverse correlation with the Index and therefore achieve its daily inverse leveraged investment objective. The Bear Fund's exposure to the Index is impacted by the Index's movement. Because of this, it is unlikely that the Bear Fund will be perfectly exposed to the Index at the end of each day. The possibility of the Bear Fund being materially over- or under-exposed to the Index increases on days when the Index is volatile near the close of the trading day.

Crypto Industry Investing Risk — Companies in the crypto industry are subject to various risks, including the inability to develop digital asset applications or to capitalize on those applications, theft, loss, or destruction of cryptographic keys, the possibility that digital asset technologies may never be fully implemented, cybersecurity risk, conflicting intellectual property claims, and inconsistent and changing regulations.

Information Technology Sector Risk — The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation, and competition, both domestically and internationally, including competition from competitors with lower production costs.

Financials Sector Risk — Performance of companies in the financials sector may be materially impacted by many factors, including but not limited to, government regulations, economic conditions, credit rating downgrades, changes in interest rates and decreased liquidity in credit markets. Additional risks of each Fund include Effects of Compounding and Market Volatility Risk, Market Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Other Investment Companies (including ETFs Risk), Cash Transaction Risk, Passive Investment and Index Performance Risk and for the Direxion Daily Crypto Industry Bear 1X Shares, Shorting or Inverse Risk. Please see the summary and full prospectuses for a more complete description of these and other risks of a Fund.
