Overview

The [Direxion Daily Metal Miners Bull 2X Shares](#) seeks daily investment results, before fees and expenses, of 200% of the performance of the S&P Metals & Mining Select Industry Index. **There is no guarantee that the fund will achieve its stated investment objective.**

Target Index

The S&P Metals & Mining Select Industry Index is a modified equal-weighted index that is designed to measure the performance of the equity securities of companies in the S&P Total Market Index that are classified by the Global Industry Classification Standard (GICS) as being in the metals and mining industry. The metals and mining industry includes companies in the following sub-industries: aluminum; coal & consumable fuels; copper; diversified metals & mining; gold; precious metals & minerals; silver; and steel. The Index does not include metal commodities. **One cannot directly invest in an index.**

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.
