Overview

The Direxion Daily 20+ Year Treasury Bull & Bear 3X Shares seek daily investment results, before fees and expenses, of 300%, or 300% of the inverse (or opposite), of the performance of the ICE U.S. Treasury 20+ Year Bond Index. There is no guarantee the funds will meet their stated investment objectives.

These leveraged ETFs seek a return that is 300% or -300% of the return of their benchmark index for a single day. The funds should not be expected to provide three times or negative three times the return of the benchmark's cumulative return for periods greater than a day.

Target Index

The ICE U.S. Treasury 20+ Year Bond Index (IDCOT20TR) is a market value weighted index that includes publicly issued U.S. Treasury securities that have a remaining maturity of greater than 20 years. Eligible securities must be fixed rate, denominated in U.S. dollars, and have $300 million or more of outstanding face value, excluding amounts held by the Federal Reserve. Securities excluded from the index are zero-coupon STRIPS, inflation linked securities, floating rate notes, cash management and Treasury bills, and any government agency debt issued with or without a government guarantee. One cannot directly invest in an index.

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.
The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds' website at direxion.com.

Short-term performance, in particular, is not a good indication of a fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

Disclosures:

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.
