## Direxion Daily Uranium Industry Bull 2X Shares

### Overview

The [Direxion Daily Uranium Industry Bull 2X Shares](#) seeks daily investment results, before fees and expenses, of 200% of the performance of the Solactive United States Uranium and Nuclear Energy ETF Select Index. **There is no guarantee that the fund will achieve its stated investment objective.**

This leveraged ETF seeks a return that is 200% of the return of its benchmark index for a single day. **The fund should not be expected to provide two times the return of the benchmark's cumulative return for periods greater than a day.**

### Target Index

The Solactive United States Uranium and Nuclear Energy ETF Select Index (SUSUNET) is designed by Solactive AG to track the performance of U.S.-listed exchange-traded funds with a focus on uranium and nuclear energy. The following top 10 holdings list combines the top holdings from the underlying indexes of the ETFs tracked by SUSUNET.

**One cannot invest directly in an index.**

*Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.*

*The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds' website at [direxion.com](#). Short-term performance, in particular, is not a good indication of a fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.*

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

**Direxion Shares Risks** — An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with the Fund concentrating its investments in a particular industry, sector, or geography which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause prices to fluctuate over time.

**Leverage Risk** — The Fund obtains investment exposure in excess of its net assets by utilizing leverage and may lose more money in market conditions that are adverse to its investment objective than a fund that does not utilize leverage. A total loss may occur in a single day. Leverage will also have the effect of magnifying any differences in the Fund's correlation with the Index and may increase the volatility of the Fund.

**Daily Index Correlation Risk** — A number of factors may affect the Fund's ability to achieve a high degree of correlation with the Index and therefore achieve its daily leveraged investment objective. The Fund's exposure to the Index is impacted by the Index's movement. Because of this, it is unlikely that the Fund will be perfectly exposed to the Index at the end of each day. The possibility of the Fund being materially over- or under-exposed to the Index increases on days when the Index is volatile near the close of the trading day.

**Nuclear Energy and Uranium Mining Companies Risk** — The price of uranium may be affected by changes in inflation rates, interest rates, monetary policy, economic conditions and political stability. The exploration for uranium and development of uranium mines involves significant financial risks over a significant period of time, which even a combination of careful evaluation, experience and knowledge may not eliminate.

**Energy Sector Risk** — Energy sector securities may be adversely impacted by changes in the levels and volatility of global energy prices, global supply and demand, and capital expenditures on the exploration and production of energy sources.

Additional risks of each Fund include Effects of Compounding and Market Volatility Risk, Leverage Risk, Market Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Daily Index Correlation Risk, Other Investment Companies (including ETFs Risk), Cash Transaction Risk, Passive Investment and Index Performance Risk. Please see the summary and full prospectus for a more complete description of these and other risks of the Fund.
