

Direxion Work From Home ETF

Methodology Summary

Fund Summary

The [Direxion Work From Home ETF](#) (WFH) may be considered a satellite holding to complement other broader positions within a portfolio. Combining companies across four technology pillars allows investors to gain targeted exposure to those growing companies that stand to benefit from an increasingly flexible work environment.

WFH targets companies providing products and technology focused on the remote work trend.

Constituent Universe

U.S. listed securities and American Depositary Receipts, with an average daily traded value in the last six months of at least \$5 million.

Benchmark Index

Solactive Remote Work Index. *One cannot directly invest in an index.*

Companies are selected for inclusion in the index by ARTIS, a proprietary natural language processing algorithm, which uses key words to evaluate large volumes of publicly available information, such as annual reports, business descriptions and financial news. The algorithm identifies these companies, including the degree to which, they provide exposure to the following categories:

- **Cloud Technologies:** companies offering cloud technology services and on-demand availability
- **Cybersecurity:** companies offering cybersecurity systems
- **Online Project and Document Management:** companies offering applications that enable the management of projects and collaboration
- **Remote Communications:** companies offering videoconferencing, instant messaging and email applications

After each algorithm is run, a false-positive check is performed in order to verify the companies obtained by the algorithm fit the particular theme. In case there is an overlapping constituent on two or more of the algorithm's runs, this constituent would be kept for the index category for which it has the highest position rank.

Component Weighting

- The ARTIS algorithm ranks companies based on their relevance to the keywords, and assigns a score to each company. The index consists of the top 10 ranked companies in each identified category, for a total of 40. Each company is equally weighted.

Rebalancing

- Semi-annually; second Wednesday in March and September.

FOR INFORMATION: 866-476-7523 | INFO@DIREXION.COM | DIREXION.COM

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at direxion.com. A Fund's prospectus and summary prospectus should be read carefully before investing.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from the(a) Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the(a) Fund at NAV.

Solactive AG is not a sponsor of, or in any way affiliated with, the Direxion Work From Home ETF.

Direxion Shares ETF Risks - Investing involves risk including possible loss of principal. There is no guarantee the investment strategy will be successful. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product

obsolescence, government regulation and competition, both domestically and internationally, including competition from competitors with lower production costs. ADRs are issued by non-U.S. companies and are subject to various foreign investment risks including but not limited to the risk that the currency in the issuing company's country will drop relative to the U.S. dollar, that politics or regime changes in the issuing company's country will undermine exchange rates or destabilize the company and its earnings. Additional risks of the Fund include, but are not limited to, Index Correlation Risk, Index Strategy Risk, American Depositary Receipts Risk and risks associated with the market capitalizations of the securities in which the Fund may invest. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
