

## World Without Waste ETF

### Overview

The [Direxion World Without Waste ETF](#) provides exposure to 50 companies, across five sub-themes, which are representative of the transformative shift from linear to circular economic models. The circular economy framework is one that is regenerative, restorative, and focused on systematic resourcefulness. The principles of the circular economy can be found across many sectors and industries today. From renewable electricity and specialty chemicals, to systems software and internet services and infrastructure, all are less harmful to the environment, while providing sustainable economic growth.

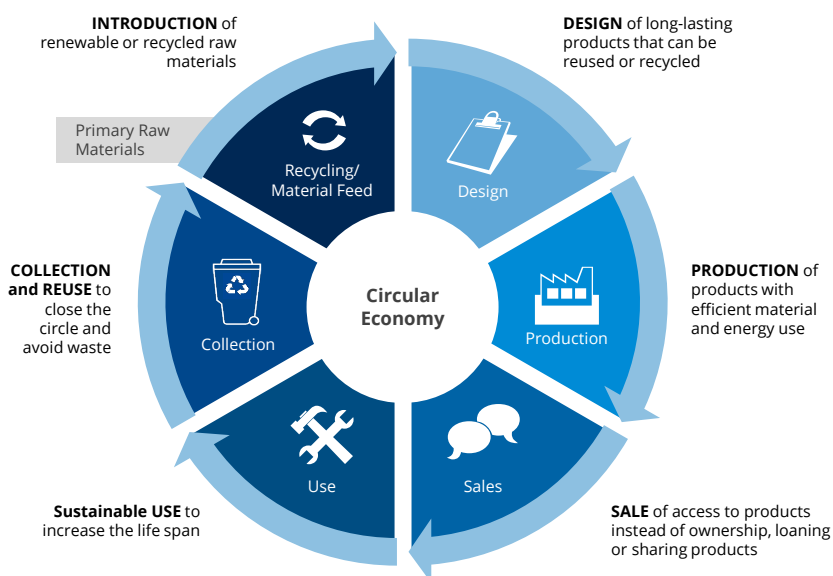

- Five sub-themes include Sustainability of Resources, Sharing Platforms, Resource Recovery, Product as a Service, and Life Cycle Extension.
- Seeks to capture the environmental and economic benefits associated with companies operating within the circular economic framework.
- May be considered a satellite holding to complement other broader positions within a portfolio where it may offer strong growth potential.

### Investment Objective

The Direxion World Without Waste ETF seeks investment results, before fees and expenses, that track the Indxx US Circular Economy Index (IUSCEI). **There is no guarantee that the fund will achieve its stated investment objective.**

\* The Fund's adviser, Rafferty Asset Management, LLC ("Rafferty") has entered into an Operating Services Agreement with the Fund. Under this Operating Services Agreement, Rafferty has contractually agreed to pay all expenses of the Fund as long as it is the advisor of the Fund other than the following: management fees, Rule 12b-1 distribution and/or service fees, taxes, swap financing and related costs, dividends or interest on short positions, other interest expenses, brokerage commissions, expenses incurred in connection with any merger or reorganization, acquired fund fees and expenses, and extraordinary expenses. If these expenses were included, the expense ratio would be higher.

### Index Description

The Indxx US Circular Economy Index (IUSCEI) is comprised of issuers that are representative of the economy shifting from a linear (one user and/or one use) model to a circular one (multi-owner and/or re-use). Securities are included if they derive 50% or more of their revenue from the following categories: sustainability of resources, sharing platforms, resource recovery, product as a service, and life cycle extension. The companies in the Index are equal weighted and rebalanced and reconstituted annually. **One cannot directly invest in an index.**

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

**Direxion Shares ETF Risks** – Investing involves risk including possible loss of principal. There is no guarantee the investment strategy will be successful. Alternative energy companies may be highly dependent on government policies that support alternative or clean energy policies and enhance the economic viability of these industries. Adverse weather conditions may cause fluctuations in the production of alternative energy. These companies are also heavily dependent on intellectual property rights and may be adversely affected by loss or impairment of those rights. Risks associated with hazardous materials, fluctuation in energy prices and supply and demand of alternative energy fuels, energy conservation, the success of exploration projects and tax incentives and subsidies and other government regulations can significantly impact this industry. Companies may also be impacted by obsolescence of existing technology, short product cycles, falling prices and profits, competition from new market entrant's industry.

Additional risks of the Fund include, but are not limited to, Index Correlation Risk, Index Strategy Risk, and risks associated with the market capitalizations of the securities in which the Fund may invest. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
